

INNOVATION

THE REVOLUTION IN THREAD SEALING!

UNIQUE PRODUCT: >180° ADJUSTABLE

Kolmat® Fibre Seal is unique when it comes to the adjustment of threaded connections. A fitting, connection, or tap can be installed in the proper position without any risk of leakage. Even when readjusted more than 180°, the connection remains 100% sealed.

UNIVERSALLY APPLICABLE

Kolmat® Fibre Seal is universally applicable and suitable for (drinking) water, steam, gas, LPG, glycol, (compressed) air and diluted acids and alkalis. The impregnated, fibre-reinforced sealing tape can withstand pressures up to 26 bar and temperatures up to 160°C. The connections are immediately loadable.

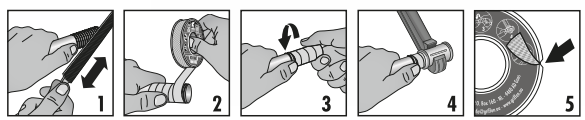

CERTIFIED QUALITY

This patented product meets (inter)national certification standards, such as GASTEC, DVGW, WRAS, KVBG/ARGB and the European EN 751-2 norm. In accordance with EN 751-2, Kolmat® Fibre Seal has been tested for gas applications up to 5 bar at -20°C to +70°C and for water applications up to 16 bar at +95°C and up to 7 bar at 130°C.

ALL CONNECTIONS

Kolmat® Fibre Seal can be used to perfectly seal all types of threaded connections. Whether they are metal connections, plastic connections or metal to plastic connections: Kolmat® Fibre Seal offers a reliable solution. The product is suitable for copper, brass, (galvanised) steel, stainless steel, zinc, PVC, CPVC and ABS.
